

## ECO FRIENDLY NATURAL HOLI COLOURS

Under the GoVan project, we have embarked on a mission to revolutionize the way we celebrate Holi. We are proud to introduce chemical-free Holi colours, handcrafted with care using natural ingredients sourced locally by the skilled women at our Multi-product Processing Centre in Pale, ensuring they are safe for both people and the environment. By steering clear of harmful chemicals, we ensure that our colours are gentle on the skin and eco-friendly, aligning with our commitment to biodiversity conservation and community well-being.

By opting for chemical-free Holi colours, we promote a celebration that is not only vibrant and joyous but also sustainable and eco-friendly. By supporting these women and choosing our chemical-free colours, you're not only embracing the spirit of Holi but also empowering local communities and promoting sustainable practices. Let's spread happiness and colour, ensuring a safe and joyous celebration for all while contributing to a greener, healthier planet.
